

MAJED ZIARA

Laravel Backend and Full Stack Engineer

+972 59 563 4627 · majedziyara@gmail.com · Gaza, Palestine / Remote

Portfolio · GitHub · LinkedIn

PROFESSIONAL PROFILE

Full-stack engineer with 4+ years of hands-on experience building Laravel backends, API-driven products, e-commerce workflows, internal business platforms, and multilingual Next.js applications. Strongest in business logic, payments, integrations, queues, webhooks, and administrative workflows, with practical ownership from requirements and data modeling through deployment and production support.

CORE EXPERTISE

BACKEND PHP, Laravel, REST APIs, Sanctum, Eloquent ORM, Socialite, RBAC, validation, queues/jobs, events, notifications, caching, webhooks, idempotency

FRONTEND Next.js, React, TypeScript, JavaScript, Tailwind CSS, App Router, responsive UI, RTL/LTR, i18n, SEO, Framer Motion

DATA AND DELIVERY MySQL, PostgreSQL, Redis, Git/GitHub, Linux VPS, Nginx, PHP-FPM, Vercel, cPanel, Postman

INTEGRATIONS Paymob KSA, Zoho Books API, OpenAI API, SMTP/email flows, OAuth, third-party business services

PROFESSIONAL EXPERIENCE

Freelance Full Stack Software Engineer | Independent | 2022–Oct 2023 · Jul 2025–Present

- Build Laravel and Next.js products end to end, covering requirements, database design, API development, interface integration, deployment, and production fixes.
- Led backend delivery for Enjoy Games, including digital-code inventory, game top-ups, checkout, payment confirmation, fulfillment, coupons, wallet and points, tickets, and operational dashboards.
- Integrated Paymob KSA payments, idempotent webhooks, Zoho Books invoicing, notifications, background jobs, retry flows, and AI-assisted customer support.
- Deliver Arabic and English interfaces with RTL/LTR support, reusable components, responsive layouts, localized SEO, and maintainable project structure.

PHP Laravel Developer | Al-Qeeq Company | 2023 · Short-term contract

- Contributed to Laravel backend development for a database-driven web product, working on application logic, feature delivery, and data workflows before the engagement ended in 2023.

CAREER BREAK | Nov 2023–Jun 2025 Professional work paused due to war conditions in Gaza; returned to software work in July 2025.

Full Stack Developer | DIGO Digital Marketing, Saudi Arabia | 2020–2022

- Joined on WordPress and moved into Laravel and JavaScript full-stack development after approximately three months as project requirements grew.
- Worked as the agency's main developer and delivered 5–6 client websites in roughly six months while collaborating with designers, content writers, and marketing staff.
- Built and maintained an internal platform for attendance, leave, payroll, employee and financial records, reports, and recurring operations while supporting multiple client projects.

SELECTED PROJECTS

Enjoy Games Digital Store | *Backend Lead*

Laravel · MySQL · Sanctum · Paymob KSA · Zoho Books · Queues · Webhooks

A digital products and game top-up platform with multiple fulfillment methods and operational workflows for both customers and administrators.

- Designed order pipelines for direct codes, single-ID top-ups, multi-ID top-ups, and account-login fulfillment, with stock and delivery evidence tracking.
- Implemented coupons, wallet and points, notifications, failed-email logs, retry handling, dashboard statistics, and payment-driven Zoho Books invoices.

Emtidad Charity Platform | *Full Stack Developer*

Laravel · Next.js · MySQL · Spatie Permission · Email OTP · REST APIs

A bilingual charity platform for humanitarian cases, donations, content management, partners, members, donors, and administrative reporting.

- Structured role-based authentication, case/category management, translations, file handling, donations, and the foundation for payment confirmation and webhooks.
- Designed the frontend as reusable, responsive components with localized routes, SEO, and separate public, donor, member, and administrator experiences.

DIGO Internal Management System | *Full Stack Developer*

Laravel · MySQL · JavaScript · jQuery · AJAX

An internal business system supporting attendance, leave, payroll, employee records, finance records, reporting, and day-to-day agency workflows.

- Owned the system as the principal developer and worked directly with non-technical teams to convert operational needs into practical features.

Khota Educational Center | *Next.js Developer*

Next.js · React · TypeScript · Tailwind CSS · Framer Motion · SEO

A responsive educational website designed for families and children, with modern visual storytelling, reusable UI components, performance-focused delivery, and bilingual-ready structure.

DIGO Multilingual Website | *Next.js Developer*

Next.js App Router · TypeScript · Tailwind CSS · next-intl · RTL/LTR

An Arabic and English agency website with reusable sections, localized metadata, responsive layouts, motion, and SEO-oriented page structure.

ADDITIONAL PROJECT WORK

Najiz Law Office — Laravel legal-services website and content management work. **Ebdaa** — responsive Next.js website for an advertising business.

EDUCATION AND CERTIFICATION

B.Sc. Information Technology — Mobile Computing and Smart Devices Applications | *Islamic University of Gaza* | 2017–2021

AI Fluency: Framework and Foundations | *Anthropic* | 2026

WORKING STYLE AND LANGUAGES

Comfortable owning work independently, collaborating with design and content teams, documenting API flows, testing endpoints in Postman, communicating progress early, and learning new tools when a product requires them.

Arabic (Native) · **English** (Professional Working Proficiency) · **Russian** (Basic)
